```

Device File Explore

The screenshot shows the Android Studio interface with the 'Device File Explorer' tab active. The left sidebar displays the project structure for 'ProjekSeninPagi', with the 'com.example.projekseninpagi' package selected. The main area shows a file explorer for an emulator (Pixel 5 API 29) with columns for Name, Permissions, Date, and Size. The file list includes system directories like 'acct', 'apex', 'bin', 'cache', 'config', 'd', 'data', 'adb', 'anr', 'apex', 'app', 'app-asec', 'app-ephemeral', 'app-lib', 'app-private', 'app-staging', 'backup', 'bootchart', 'cache', 'dalvik-cache', and 'data'. The 'data' directory is expanded, showing sub-directories like 'com.android.apps.tag', 'com.android.backupconfirm', 'com.android.bips', 'com.android.bluetooth', and 'com.android.bluetoothmidiservice'. The bottom status bar indicates 'Launch succeeded (4 minutes ago)'.
